***Making a Difference* Aug 01 2020 Emphasis on measurement techniques can interfere with understanding how well particular social programs in their field work. In *Making a Difference: The Practice of Sociology*, Irwin Deutscher links traditional sociological concerns with applied sociology in an effort to overcome this problem. He contributes to the debate over the extent to which health, educational, and social programs initiated by the Roosevelt, Kennedy, and Johnson administrations have been successful in intimate, human terms. The work is divided into five parts: "Toward a Useful Sociology" is a collection of essays concerning the causes of social problems and the uses of evaluation research. "On Doing Applied Research" explores research tools and stereotypes. "The Raised Eyebrow" points out obstructions to useful program evaluation. "Vignettes" deals with specific areas of social programs: public housing, aging, family, disaster relief, small town petty crime, the integration of public facilities, delinquency, nursing, and the education of tribal people. Deutscher believes that the introduction of a sociological perspective can provide a positive element to interdisciplinary pursuits. This belief, as well as his fresh perspectives on both the strengths and limitations inherent in applied sociology, offer the field a revitalizing lift. As such, this highly informative, thought-provoking volume will be of interest to sociologists and policymakers in health, education, crime, welfare, housing.**

Making a Difference in Education Jan 30 2023 What is working in education in the UK - and what isn't? This book offers a highly readable guide to what the latest research says about improving young people's outcomes in pre-school, primary and secondary education. Never has this issue been more topical as the UK attempts to compete in the global economy against countries with increasingly educated and skilled work-forces. The book discusses whether education policy has really been guided by the evidence, and explores why the failings of Britain's educational system have been so resistant to change, as well as the success stories that have emerged. Making a Difference in Education looks at schooling from early years to age 16 and entry into Further Education, with a special focus on literacy, numeracy and IT.

Reviewing a large body of research, and paying particular attention to findings which are strong enough to guide policy, the authors examine teacher performance, school quality and accountability, and the problematically large social gap that still exists in state school education today. Each chapter concludes with a summary of key findings and key policy requirements. As a comprehensive research review, Making a Difference in Education should be essential reading for faculty and students in education and social policy, and of great interest to teachers and indeed to anyone who wants to know about the effectiveness of UK education policy and practice, and where they should be going.

Change Matters Jun 30 2020 While many books address the 'what' of change in education, this addresses the 'how'. The pressure for continuous adaptation and innovation in education is relentless, yet there is more failure in implementation of change than success. These failures are damaging to staff and students, as well as costly. Change Matters offers a practical guide to change management for teachers and administrators across all education sectors and for training managers in workplace settings. Change Matters assists educators to develop their abilities to manage their own change projects, and also to help their organisations to manage their overall improvement and

innovation activities. Geoff Scott draws on successful experience to create a framework for the educational change process. He shows how to initiate, develop, implement and evaluate a new learning program, and how to manage continuous quality improvement and innovation at the organisational level. The need for leadership is assessed, and the particular circumstances of workplace trainers are discussed. The book is illustrated with case studies and reflective exercises which can be used individually or with other educators. 'An eminently readable and practical guide for those who want to make sure that the educational changes they attempt really do make a difference for their students. Highly recommended.' - Professor Michael Fullan, Dean, Ontario Institute for Studies in Education, University of Toronto, and author of *The New Meaning of Educational Change* and of the *What's Worth Fighting For* trilogy with Andy Hargreaves.
